A Cost-Effective Approach to Training Across Multi-College Systems

Expert Training Utilizing a Shared Cost Model

Shared-Cost Banner® Functional Training *Drives Costs Down for All College System Members*

Aspect Consulting can provide onsite or virtual training for the core Banner modules that represent the functionality that most Higher Education institutions utilize on a daily basis to run the college or university.

To provide a strong return on investment, Aspect is offering to provide training utilizing a shared cost model: an Aspect trainer will provide training for attendees from multiple colleges within a college system at one time, assessing a single hourly training fee that can be split among participating colleges.

- **Expert Functional Training**

We have the highly qualified trainers with expertise in the higher education space to help you keep your staff up to date with the latest ERP releases.

- **Cost Sharing Payment Structure**

Aspect will provide training for a single hourly fee for 2 or more colleges within your system. With the hourly fee split between each member school, it significantly drives down the rate for each participating college. Classes will be kept to 25 attendees to ensure quality of learning. A member college can host the training at their facility, or opt for remote training to further drive down costs and avoid hotel/travel fees.

- **Strong Return on Training Investment**

A shared cost model can drive down costs for all members of your college system, and provide the cost-effective training approach that allows your institution to ensure your staff has the ability to successfully perform day to day operations and meet any upgrade training deadlines.
