

Rebate Analysis Suite

Complete Visibility into Rebate Processing

The Advantage of Aspect's Rebate Analysis Suite

Aspect Consulting's Rebate Analysis Suite is a flexible component-based suite that includes utilization data cleansing, rebate analysis dashboard reporting, and analysis services, placing all the data you need to detect invalid utilization and monitor rebate pay out across your customers over time, helping you to avoid costly payout on invalid utilization.

Cleanse

Load and cleans utilization data. The suite includes services for loading utilization data submitted by your customers. We use our AuthentiClaim engine to transform, validate and detect errors in utilization submitted by your customers, and remove those lines for dispute reporting.

Analyze

Analyze your rebate data. Dashboard reporting provides contract analysts with insight into rebate amounts across your trading partners, with drill down to details by contract. Alerts let you know when significant deviations occur in rebate amounts over the last period, so you can investigate prior to payment.

Take Control

Detect and remediate issues. Utilize dispute reporting to remediate issues with your trading partners prior to payout, or utilize our contract analyst resources to perform root cause analysis and assist with dispute reporting.

Key Advantages

Load and Detect Invalid Utilization • Increase Visibility into Rebate Payment Amounts • Avoid Payout on Invalid Rebates

One Unified Service Suite *Rebate Analysis Suite is Comprised of ...*

Utilization Data Cleansing

Aspect utilizes its Authenticclaim Rx engine to convert and load utilization files from your trading partners and scrub for errors (such as duplicate records and records with aberrant quantity). Clean data is then available for upload to your payment system, and errors are summarized for dispute reporting.

- Ability to load a files in the layout utilized by your trading partners, and convert for processing.
- Data is validated and normalized in a format consumable for dispute reporting.
- Eliminates any manual effort to transform and cleanse utilization files.

Rebate Monitor Dashboard

The Rebate Monitor Dashboard includes metrics that help contract analysts monitor total rebate amounts by customer, rebate composition, and payouts to customers period over period, with alerting when significant deviations are detected.

- **Filter** by segment, product and time.
- **View total rebates** and sales amounts.
- **View rebate composition** by customer.
- **View alerts** targeting contracts with significant deviations.
- **Drill in to details** by contract and plan.

Root Cause Analysis and Disputing Services

If desired, Aspect can provide a contract analyst for assistance with root cause analysis when rebate amounts significantly change period over period, and help you to dispute errors with your trading partners.

- Track rebates across customers.
- Perform root cause analysis of deviations.
- Assist with dispute reporting and remediation.
