Oracle Audit Services

Advocate Services for Proactively Conducting an Oracle Software Audit

We Help You to Proactively Ensure Compliance

Let Aspect Audit Your Environment *Before* an Oracle Audit
And We Can Save You Hundreds of Thousands in Penalties

It is well known that it's not a matter of if, but when you will be audited by Oracle. Over time, your organization's use of modules and features may deviate from original licensing, putting you at risk of violating agreements. Oracle's level of complexity in feature licensing can quickly overwhelm an organization's resources.

Our experts can help you proactively prepare for an Oracle software audit *before* it occurs, helping you to reduce both risks and costs. Our experts will...

- Conduct a comprehensive review of your purchase agreements.

- Audit your current feature utilization.

- Set up a plan to make your organization compliant with current terms, and recommend go-forward licensing that provides the best return on investment.

- Work with you to remediate any out of compliance issues found.

Review Purchase Agreements	Conduct Feature Usage Audit	Create Compliance Plan & Remediate
Proactively review all current agreements: - Review software environment. - Gain understanding of feature/function licensing across your environment.	Utilize scripts to conduct a comprehensive feature usage audit: - Identify non-licensed features. - Identify any under utilized, yet licensed features.	Create a plan to bring your environment into compliance: - Create a roadmap for moving forward. - Work with you to remediate issues to bring the environment into compliance.
